

MISBAH FAYAZ

Srinagar, Jammu & Kashmir | misbafayaz8@gmail.com

EDUCATION

B.Tech in Artificial Intelligence & Data Science

University of Kashmir, North Campus | Expected 2029

SKILLS

Python, SQL, NumPy, Prompt Engineering, Git/GitHub, Claude AI & AI Tooling, Flask (Basics), Data Structures & Algorithms (Fundamentals)

PROJECTS

Circuit.IQ — *Physics Simulation Engineer* | Semester Project

- Built the physics simulation engine for a browser-based virtual physics lab using Python and NumPy
- Developed circuit-solving functions using Modified Nodal Analysis (MNA), including KVL/KCL verification and power calculations
- Built and tested 15+ experiment simulation modules and generated result graphs using Matplotlib
- Designed a Flask API layer to expose simulation functions to the team's backend
- Collaborated in a 5-member cross-functional team (frontend, backend, AI integration, QA) to deliver an integrated full-stack application

60 Days of AI Challenge — *Personal Learning Project*

- Completing a self-driven 60-day challenge exploring prompt engineering, context engineering, chain-of-thought reasoning, and AI tool-building using Claude
- Documenting daily learnings and projects on GitHub with structured markdown write-ups

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming — SkillUp
- Participant, ViCoDathon (Hackathon)
