

MISBAH FAYAZ

Srinagar, Jammu & Kashmir | misbafayaz8@gmail.com

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience building Python-based simulation engines, circuit-solving algorithms, and Flask APIs. Skilled in NumPy, SQL, and prompt engineering, with a track record of applying AI tools (Claude AI) to build and document technical projects. Seeking opportunities in AI/ML roles to apply strong analytical and problem-solving skills.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

University of Kashmir, North Campus | Expected 2029

PROJECTS

Circuit.IQ — Physics Simulation Engineer

Semester Project

- Engineered the physics simulation engine for a browser-based virtual physics lab using Python and NumPy
- Implemented circuit-solving algorithms using Modified Nodal Analysis (MNA), including KVL/KCL verification and power calculations
- Built and tested 15+ experiment simulation modules, generating result graphs with Matplotlib
- Deployed a Flask API layer to expose simulation functions for backend integration
- Collaborated within a 5-member cross-functional team (frontend, backend, AI integration, QA) to deliver an integrated full-stack application

60 Days of AI Challenge — Personal Learning Project

- Applying prompt engineering, context engineering, and chain-of-thought techniques using Claude AI; documenting daily projects on GitHub with structured technical write-ups.

SKILLS

Python, SQL, NumPy, Flask (Basics), Prompt Engineering, Git/GitHub, Claude AI & AI Tooling, Data Structures & Algorithms (Fundamentals)

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming — SkillUp
- Participant, ViCoDathon (Hackathon)
